

To Whom It May Concern:I am a XM subscriber and have been for approximately 6 months. In those 6 months I have enjoyed the broadcast on XM better than any other radio station on the air. During travel time I listen to the weather channels that they provide and find them to be valuable in travels. Local radio does not give the weather but every so often which is not acceptable when you are driving long distances and need to know ahead of time. In closing I do not support the NAB's petition 04-160 to regulate XM radio. I pay for this service and I don't think anyone should be allowed to dictate what I can and cannot listen to.

Sincerely  
Randy Kinard
